This map may not represent all hazards. It will be updated as new information becomes available.

Note to Users:
1. Limitations of Flood Plain Maps: Flood plain maps are generated based on preliminary floodplain procedures and aerial photography, satellite images, field surveys, and floodplain model runs, and are based on historical and current flood information. The accuracy of the floodplain boundaries is limited by the accuracy of the underlying data and the flood model. The floodplain maps are subject to flooding from tributary streams that are not indicated on the maps.
2. No freeboard allowances are included in the mapping. The Designated Flood is the highest flood that has a 1% chance of being equaled or exceeded in any one year. The Designated Debris Flood is the highest flood that has a 1% chance of being equaled or exceeded in any one year. The Designated Debris Flood is the highest flood that has a 1% chance of being equaled or exceeded in any one year.
3. The accuracy of the location of a floodplain boundary is shown on the map to indicate the uncertainty of the location. The actual floodplain boundary may extend beyond the mapped area.
4. The accuracy of the location of a floodplain boundary is shown on the map to indicate the uncertainty of the location. The actual floodplain boundary may extend beyond the mapped area.
5. The accuracy of the location of a floodplain boundary is shown on the map to indicate the uncertainty of the location. The actual floodplain boundary may extend beyond the mapped area.
6. The accuracy of the location of a floodplain boundary is shown on the map to indicate the uncertainty of the location. The actual floodplain boundary may extend beyond the mapped area.
7. The accuracy of the location of a floodplain boundary is shown on the map to indicate the uncertainty of the location. The actual floodplain boundary may extend beyond the mapped area.
8. The accuracy of the location of a floodplain boundary is shown on the map to indicate the uncertainty of the location. The actual floodplain boundary may extend beyond the mapped area.
9. The accuracy of the location of a floodplain boundary is shown on the map to indicate the uncertainty of the location. The actual floodplain boundary may extend beyond the mapped area.
10. The accuracy of the location of a floodplain boundary is shown on the map to indicate the uncertainty of the location. The actual floodplain boundary may extend beyond the mapped area.

Notes:
1. This map may be purchased at 1:17,500 scale, or call 604.990.2311.
2. The accuracy of the location of a floodplain boundary is shown on the map to indicate the uncertainty of the location. The actual floodplain boundary may extend beyond the mapped area.
3. The accuracy of the location of a floodplain boundary is shown on the map to indicate the uncertainty of the location. The actual floodplain boundary may extend beyond the mapped area.
4. The accuracy of the location of a floodplain boundary is shown on the map to indicate the uncertainty of the location. The actual floodplain boundary may extend beyond the mapped area.
5. The accuracy of the location of a floodplain boundary is shown on the map to indicate the uncertainty of the location. The actual floodplain boundary may extend beyond the mapped area.
6. The accuracy of the location of a floodplain boundary is shown on the map to indicate the uncertainty of the location. The actual floodplain boundary may extend beyond the mapped area.
7. The accuracy of the location of a floodplain boundary is shown on the map to indicate the uncertainty of the location. The actual floodplain boundary may extend beyond the mapped area.
8. The accuracy of the location of a floodplain boundary is shown on the map to indicate the uncertainty of the location. The actual floodplain boundary may extend beyond the mapped area.
9. The accuracy of the location of a floodplain boundary is shown on the map to indicate the uncertainty of the location. The actual floodplain boundary may extend beyond the mapped area.
10. The accuracy of the location of a floodplain boundary is shown on the map to indicate the uncertainty of the location. The actual floodplain boundary may extend beyond the mapped area.
